

EE14 Series

Hygrostats for Wall and Duct Mounting Applications

The EE14 hygrostat is based on the well proved E+E humidity sensors of the HC series, which guarantee excellent long term stability, low hysteresis and high resistance to pollutants. The switching threshold is freely adjustable in the range of 10...95% RH with a hysteresis which can be set independently between 3% and 15% RH.

EE14 hygrostat is available for wall or duct mounting, the right choice of protection filter cap enables maintenance free function in heavily polluted environment.

Typical Applications

- refrigeration
- swimming halls
- climate- and ventilation controls

Features

- maintenance free operation
- easy adjustment via poti
- working range 10...95% RH
- wettable

Working Principle

With a potentiometer it is possible to adjust the threshold between 10 and 95% RH. A second potentiometer is setting the switching-hysteresis between 3 and 15% RH.
